UNZA | Health Insurance & NHIMA

Ridgeway Campus student survey • 21 Aug – 29 Sep 2026 • 358 original responses • Report dated 02 Oct 2026

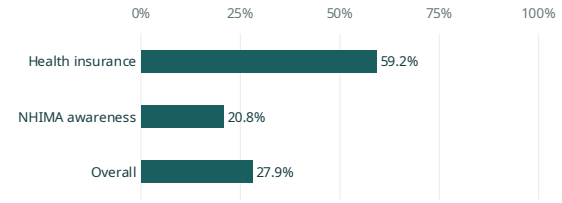
Sex	Year of study	Programme	Insurance registration
All	All	All	All

Change the four yellow dropdowns to explore a cohort. All cards, dashboard charts and detailed summaries recalculate.

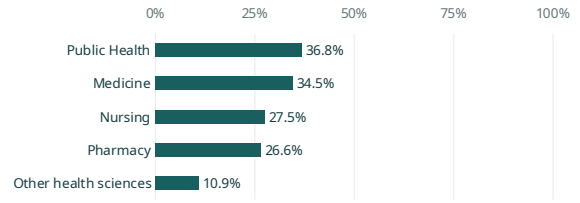
RESPONDENTS	ADEQUATE OVERALL	MEAN OVERALL SCORE	ADEQUATE NHIMA
358	27.9%	9.7	20.8%
Selected cohort | total 358	n = 100 | threshold 12/19	Out of 19 correct answers	n = 74 / 356 valid

HEALTH-INSURANCE ADEQUACY	REGISTERED WITH INSURANCE	SOCIAL-MEDIA REACH	BENEFITS + LIMITATIONS
59.2%	38.5%	70.4%	6.1 /14

Adequacy by knowledge domain

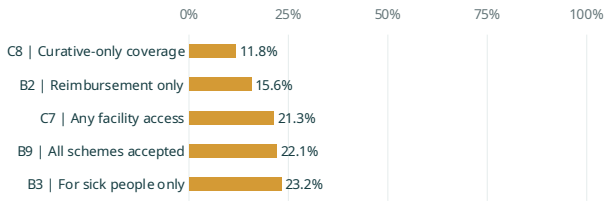


Overall adequacy by programme

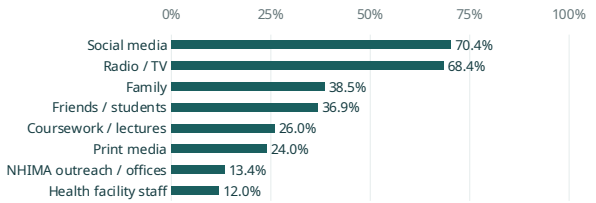


Rates use selected valid respondents. Programme rates are descriptive; full-sample tests are on Associations.

Five priority misconceptions | % correct



Where students get information | reach



Priority items are the five lowest B/C items in the full sample; cohort filters update their rates, not the selected item set. F2 sources are multi-select.

Interpretation & next steps

Full sample: 27.9% overall adequate; 20.8% NHIMA adequate. Current cohort: 27.9% overall adequate. Prioritise NHIMA orientation and targeted misconceptions.

Provisional scoring key: validate policy-specific NHIMA answers before final use. NHIMA valid n = 356; overall n = 358 retains two incomplete C blocks with missing items scored zero.
